

CompAM Fund Sicav

Active Emerging Credit

31 October 2024

Fund Overview

Active Emerging Credit is an effective solution for investors who want to achieve returns above money market rates over the medium-term investing in a diversified portfolio of bonds issued by companies and governments of emerging markets.

A mix of fundamental analysis and flexibility aims to improve fund returns while paying attention to downside risk.

Compass Asset Management has over 15 years of experience investing in Emerging market credits.

Investment Strategy

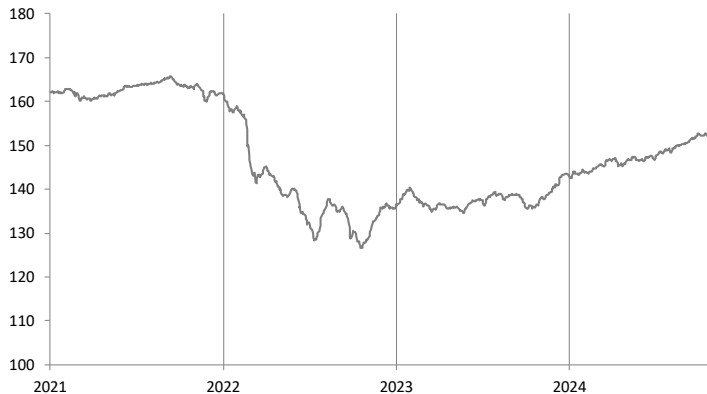

We are active investors combining a fundamental value approach with a macro overlay.

Our bottom-up credit selection process based on a contrarian style and low portfolio turnover will produce sustainable alpha over the medium to long term.

To mitigate portfolio risks and drawdowns we dynamically manage credit exposure varying the percentage of cash held on portfolio.
